## Paradise Hills Park to Receive a New Irrigation System

*The 8-10 week construction project is set to begin on April 26<sup>th</sup>*

**BERNALILLO COUNTY-** The Paradise Hills Park, located on the northeast corner of Park Lane and Paradise Boulevard, will be receiving an overhaul to its 30 year old irrigation system at the end of this month. Several major components of the current system have failed, making this project a top priority for Bernalillo County.

"This park is going to be receiving some much needed attention over the next few weeks," says District 4 Commissioner Michael Wiener. "Families in this neighborhood really deserve to have a healthy, functional park. With these renovations the park will be able to flourish and grow, all the while conserving our water."

The park will be fenced off during the construction, for security and safety purposes, but turf soccer fields on the northwest corner of Paradise Blvd. and La Paz Dr. will remain open. The \$260,000 project is being paid for through 2008 Parks and Recreation bond.
